Treatment of symptomatic convergence insufficiency with a home-based computer orthoptic exercise program

A Systematic Review of the Applicability and Efficacy of Eye Exercises

Active Rehabilitation of Concussion and Post-concussion Syndrome

Are Orthoptic Exercises an Effective Treatment for Convergence and Fusion Deficiencies

Diagnostic Validity of Clinical Signs Associated with a Large Exophoria at Near

Non-surgical interventions for convergence insufficiency

Objective Assessment of Vergence after Treatment of Concussion-Related CI- A Pilot Study

Pediatric Ophthalmology/Strabismus Preferred Practice Pattern® Development Process and Participants

Reading difficulties and the pediatric ophthalmologist

Relief of asthenopic symptoms with orthoptic exercises in convergence insufficiency is achieved in both adults and children

Research Conducted by M. Scheiman and Co-Researchers Has Updated Our Knowledge about Clinical Trials Research

Systematic reviews of optometric interventions

The changes in Phoria and convergence to divergence Peak Velocity ratio Are correlated

The Effectiveness of Home-based Pencil Push-up Therapy Versus Office-based Therapy for the Treatment of Symptomatic Convergence Insufficiency in Young Adults.

The Effectiveness of Home-based Pencil Push-up Therapy Versus Office-based Therapy for the Treatment of Symptomatic Convergence Insufficiency in Young Adults.

INC:

Anatomy and physiology of the primate interstitial nucleus of Cajal. I. Efferent projections

Anatomy and Physiology of the Primate Interstitial Nucleus of Cajal. II. Discharge Pattern of Single Efferent Fibers

Discharge Characteristics of Vestibular Saccade Neurons in Alert Monkeys

Gait Balance Disorder by Thalamic Infarction with the Disorder of Interstitial nucleus of cajal

Generation of torsional and vertical eye position signals by the interstitial nucleus of Cajal
Input-output organization of inhibitory neurons in the interstitial nucleus of Cajal projecting to the contralateral trochlear and oculomotor nucleus

Interstitial Nucleus of Cajal Encodes Three-Dimensional Head Orientations in Fick-Like Coordinates

Midbrain Control of Three-Dimensional Head Orientation

Neck Muscle Synergies During Stimulation and Inactivation of the Interstitial Nucleus of Cajal (INC) Projections and Firing Properties of Down Eye-Movement Neurons in the Interstitial Nucleus of Cajal in the Cat

Relationships between neck muscle electromyography and three-dimensional head kinematics during centrally induced torsional head perturbations

Rigidity and dorsiflexion of the neck in progressive supranuclear palsy and the interstitial nucleus of Cajal

Spatial characteristics of neurons in the central mesencephalic reticular formation (cMRF) of head-unrestrained monkeys

Synaptic organization of frontal eye field and vestibular afferents to interstitial nucleus of Cajal in the cat

Temporal characteristics of neurons in the central mesencephalic reticular formation of head unrestrained monkeys

Three-Dimensional Eye–Head Coordination After Injection of Muscimol Into the Interstitial Nucleus of Cajal (INC)

Vertical eye movement-related responses of neurons in midbrain near intestinal nucleus of Cajal

Medical Vestibular Nucleus:

Age-related change of the neuronal number in the human medial vestibular nucleus- A stereological investigation

Muscarinic and Med vestib nucleus cerebellar projections

Effects of neck muscle activities during rhythmic jaw movements by stimulation of the medial vestibular nucleus in rats

Electrophysiological properties of morphologically-identified medial vestibular nucleus neurons projecting to the abducens nucleus in the chick embryo

In vitro studies of medial vestibular nucleus neurones PhD dissertation

INTRINSIC MEMBRANE PROPERTIES AND PLASTICITY IN MEDIAL VESTIBULAR NUCLEUS NEURONES PhD Dissertation

Long-term Potentiation and Depression after Unilateral Labyrinthectomy in the Medial Vestibular Nucleus of Rats
Synaptic Plasticity in Medial Vestibular Nucleus Neurons- Comparison with Computational Requirements of VOR Adaptation

Medullary Reticular Formation:

Cerebellar afferents originating from the medullary reticular formation that are different from mossy, climbing or monoaminergic fibers in the rat

Dorsal and ventral aspects of the most caudal medullary reticular formation have differential roles in modulation and formation of the respiratory motor pattern in rat

Intrinsic membrane properties of pre-oromotor neurons in the intermediate zone of the medullary reticular formation

Role of the medial medullary reticular formation in relaying vestibular signals to the diaphragm and abdominal muscles

Terminal field specificity of forebrain efferent axons to the pontine parabrachial nucleus and medullary reticular formation

Mesencephalic reticular formation:

A central mesencephalic reticular formation projection to the Edinger–Westphal nuclei

A central mesencephalic reticular formation projection to the supraoculomotor area in macaque monkeys

Clinical Study of Eleven Patients with Midbrain Infarction-Induced Oculomotor Nerve Palsy

Effects of unilateral midbrain lesions on gaze (eye and head) movements.pdf

HISTORY - SENSORY PROPERTIES OF NEURONS IN THE MESENCEPHALIC RETICULAR FORMATION

New Brain Structure and Function Study Findings Have Been Reported by Investigators at University of Munich (A central mesencephalic reticular formation projection to the Edinger-Westphal nuclei)

On the Role of the Pedunculopontine Nucleus and Mesencephalic Reticular Formation in Locomotion in Nonhuman Primates
