

# Super Patches: Enhancing Brain Function Naturally

## How Super Patch Technology Works:

Super Patch Technology utilizes uniquely arranged ridges resembling QR codes. When these ridges touch the skin, they transmit unique signals that interact with the body's nervous system. This Vibrotactile Technology triggers sensations, sending information to the brain. The brain and nervous system process this information, leading to various benefits such as pain management, improved mobility, better sleep, enhanced focus, and mood.

## How to Use Super Patches:

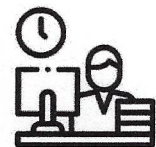

1. Placement: Apply firmly to clean, dry, unbroken skin anywhere on the body (except Freedom Patch – place the patch near the area of pain or ache). Change the location daily.
2. Duration: Patches can be worn for 24 hours or a shorter period.
3. Most patches can be used at any time during the day except:
  - a. REM Patch: Apply before sleep and remove upon waking.
  - b. Focus Patch: Apply earlier in the day. Avoid just before going to sleep.
